

Serum-Free Media

Optimized for Enhanced Cell
Growth and Protein Expression

Product Introduction

Pricella®'s R&D team has independently developed a range of serum-free media (SFM) for the cultivation and protein expression of HEK293, CHO, Hybridoma and VERO cells. These chemically defined serum-free media are suitable for a wide array of cellular research applications and deliver consistent, reliable performance.

Product Features

User-Friendly

Ready-to-use formulations for easy handling

Enhanced Performance

Promotes high-density, high-viability cell growth with improved protein expression

Stable and Consistent

Chemically defined formula minimizes inter-batch variability

Reliable Quality

Manufactured under GMP standards to ensure low endotoxin levels and no microbial contamination

Experimental Results (Partial)

Compared to competitors, Pricella® **Hybridoma SFM** ensures superior and consistent antibody expression.

Pricella® HEK293 SFM supports high-density, high-viability cell growth.

Product Lists

Product Name	Cat. No.	Size	Price
HEK293 Serum-Free Basal Medium	SF1001	500 mL	\$60
HEK293 Serum-Free Feed A	SF1002	50 mL	\$18
HEK293 Serum-Free Feed B	SF1003	5 mL	\$8
CHO Serum-Free Basal Medium	SF2001	500 mL	\$60
CHO Serum-Free Feed A	SF2002	100 mL	\$18
CHO Serum-Free Feed B	SF2003	10 mL	\$8
Hybridoma Serum-Free Medium	SF3001	500 mL	\$60
VERO Serum-Free Medium	SF4001	500 mL	\$48

HEK293 SFM

CHO SFM
