infinity choices
...the path of research

UNIVERSAL BIOTECHNOLOGY

An ISO 9001:2015 Certified Company

PVT. LTD.

ABOUT US

Universal Biotechnology Pvt. Ltd, a Bio-Tech research oriented consultant and Indian channel partner of many renowned manufacturers of overseas brands. We are India's leading distributors of ELISA Kits, Antibodies, Molecular Biology reagents, Chemicals, Instruments and Consumables related to Academic research, Clinical Diagnostics, Industrial Research and Food Industry. We assure you to provide quality products, within the committed time period, best price and along with after sales support. We always wish to associate ourselves with any esteemed organization that are in need for quality products in every research area. The company strives to provide products and services of the highest standards possible, consistently superior, and more satisfying than that available anywhere else with the aim of its motto "**One Stop, Infinity Choices**"!

Our Clientele

ELISA KITS

An ELISA (Enzyme-Linked Immunosorbent Assay) is a multi-well plate-based immunoassay within which one of the assay components, typically an antibody or sample, is adsorbed onto a plate. Offering rapid, quantitative, and sensitive analyte detection at relatively low cost, ELISA represent one of the simplest assay formats to perform. ELISA kits are available in various species with no cross reactivity, better sensitivity.

- Multiplex ELISA Kit
- Competitive ELISA Kit
- Sandwich ELISA Kit
- Fast ELISA Kit
- Uncoated ELISA Kit

High
Sensitivity

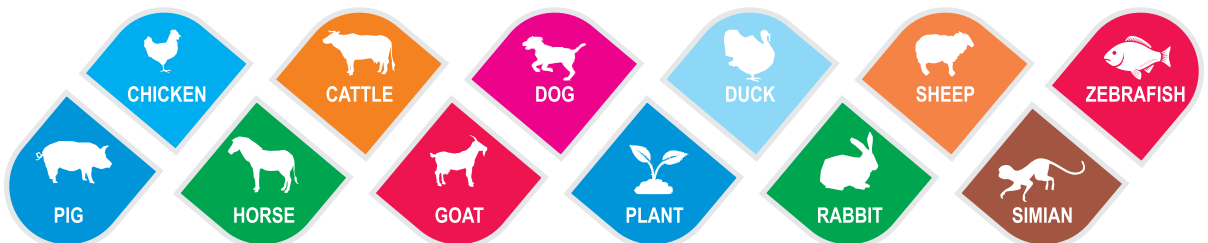

PG-Level

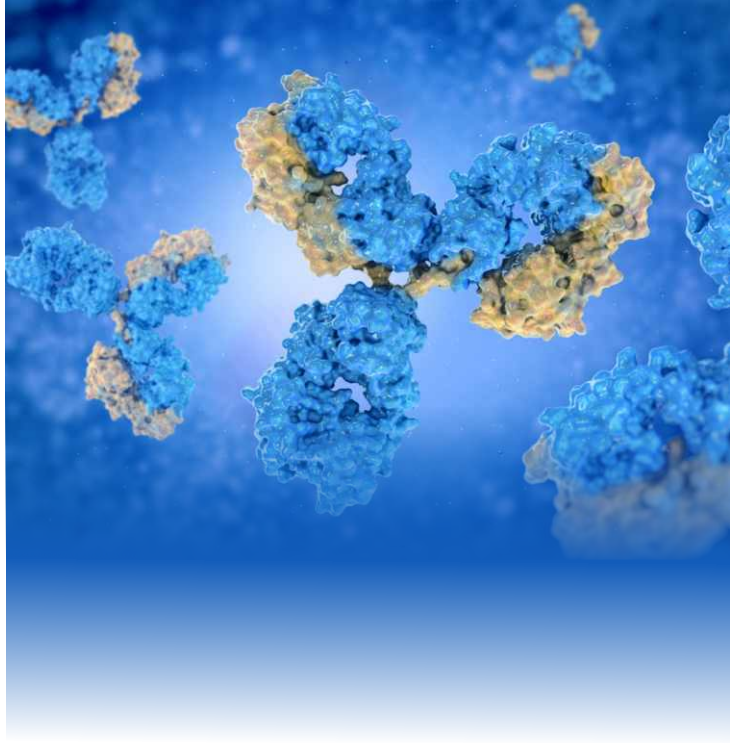

High
Specificity

The cross-reaction
rate is less than 5%

Excellent
Recovery Rate

85%-115%

ANTIBODIES

Antibodies are immunoglobulins abbreviated as Ig and is synthesized by the body's immune system. All types of antibodies are available with various applications: WB, IHC, ICC, ELISA, IF, IHC-P, Lateral flow. Antibody products are strictly validated to ensure the purity and quality.

- Polyclonal Antibodies
- Monoclonal Antibodies
- Secondary Antibodies
- Recombinant Antibodies
- Flow Cytometry Antibodies
- Phospho-antibodies
- Loading Control
- Western HRP Substrate

Small Pack Size Available

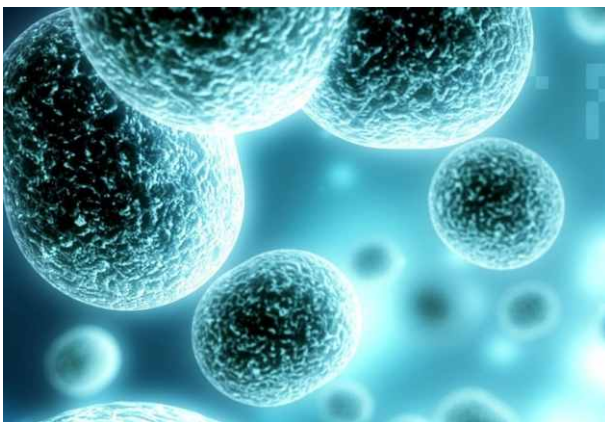

MOLECULAR BIOLOGY PRODUCTS

Molecular Biology focuses mainly on the structure, composition and interactions of molecules within the cells. Nucleic acids and proteins are prime molecules of analysis under molecular biology.

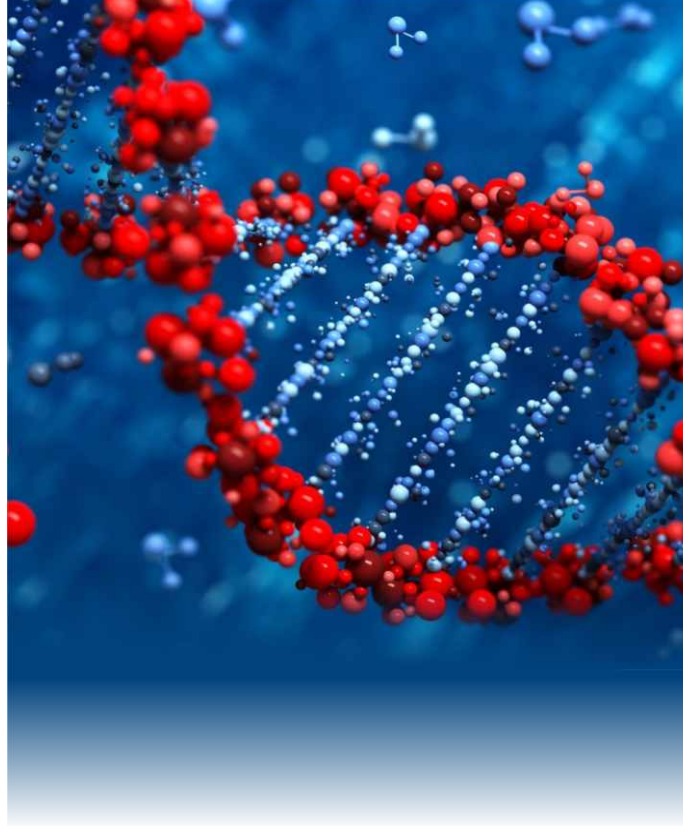

- DNA Isolation, Clean Up & Purification Kits
- RNA Isolation Kits
- Plasmid DNA Isolation Kits
- DNA and Protein Ladders
- Restriction Enzymes And Ligases
- Primers
- Clones
- PCR, RT PCR And qPCR Reagents
- Accessories, Buffers & Reagents
- Many More....

CELL CULTURE

Cell culture is fundamental experimental techniques to life science, widely used in scientific research and industrial production.

- Basal Media
- Specialized Media
- Serum Reduced Formulations
- Antibiotics
- Cell Dissociation Reagents
- Supplements
- Cell Staining Kit
- Cell Counting Kit
- Cell State Detection Kit
- Organelle Extraction Kit

ASSAY KITS

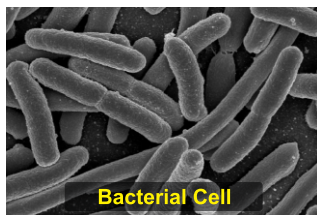

Assay kits are used in life science research, drug discovery & development, and environmental monitoring in a broad range of applications such as studying disease pathways, screening for potential drug candidates and evaluating biopharmaceutical production processes.

- Oxidative Stress Kits
 - Coenzyme Factors Kits
 - Energy Metabolism Kits
 - Carbohydrates Metabolism Kits
 - Lipid Metabolism Kits
 - Nitrogen Metabolism Kits
 - Ion Metabolism Kits
 - Food Safety Kits
 - Apoptosis Detection Kits
 - Protein Detection Kit
 - Labelling Kits
 - Protein Purification Kits
 - Protein Extraction Kits
- Many More...

RECOMBINANT PROTEINS

Recombinant proteins are manipulated versions of native proteins produced using recombinant DNA to generate large amounts of a specific protein. The recombinant DNA is cloned into a vector introduced in a specific expression to support the expression of the gene of interest and the production of the recombinant protein.

- Interleukins
- Interferons
- TNFs
- Growth Factors
- Chemokine And Signalling Proteins
- Viral And Bacterial Antigens
- Human Immunoglobulins
- CD Antigens

BENCHTOP EQUIPMENTS

We supply Benchtop Equipments for chemical, biological, environmental, forensic, food and clinical diagnostic applications which provide comfort, accuracy and convenience to conduct safe and efficient experiments during research.

- Centrifuge Range
- Dry Bath Range
- Stirring Range
- Shaking Range
- Mixing Range
- Homogenizer
- Transilluminator
- pH Meters
- Ice Flaking Machine

OTHER CONSUMABLES

- Microcentrifuge Tubes
- Manual Pipette Controller
- Cryogenic Storage Box
- Gloves
- Parafilm
- Nitrocellulose Membrane
- Syringe Filter
- Serological Pipets
- Tissue Culture Plastic Ware
- Pipette Tips
- PCR Related Plastic Ware

CUSTOM SERVICES

- DNA Synthesis
- RNA Synthesis
- Gene Synthesis
- Generation Sequencing Services
- High-throughput Sequencing
- Genetic Analysis
- Gene Chip
- Nucleic Acid And Protein Interaction
- Peptide And Protein Synthesis
- Antibody Synthesis
